

## Counter Fridge and Freezer range

Ever thought it would make sense if the people who spend their time fixing things were involved in making them? They would probably design equipment that worked better for longer.

That is what we thought so we teamed up with an innovative European manufacturer and used our knowledge, gained through a lifetime of resolving equipment breakdowns, to build the most reliable range of commercial refrigeration equipment we think you are likely to find.

Catering equipment with **reliability** built in

## AXIS MODELS RC7260R/FC7260R/RC7380R/FC7380R

We believe our refrigeration range is unsurpassed. We use the highest grade materials, the best components and precise engineering skills to make our equipment right for you. But do not take our word for it, look at the list of features, make your own comparisons and draw your own conclusions.

### Features:

- Manufactured in Europe with care and attention to detail
- Made from AISI 304 18/8 stainless steel, exterior and interior
- Insulated with ecological polyurethane
- Includes LED panel to clearly display temperature
- Designed to operate up to 46°C ambient temperature, draws and vents through the front panel allowing installation on a plinth, tight to walls or other equipment.
- Uses environmentally-friendly refrigerants
- Auto defrost
- Gastronorm-sized
- Supplied with 2 generous interior shelves (per door) as standard
- Fitted with heavy duty lockable swivel castors for easy manoeuvrability
- Self-closing doors which, when opened beyond 90°, are held in that position for ease of use
- Removable magnetic door gasket
- Removable racking with anti-tilt slides
- Easy clean interior

\*All models are 700mm deep. Available with draws or doors to suit your needs
